

ANTA · BY MK TECHNOLOGIES

MACHINE KNOWLEDGE RESILIENCE SOLUTIONS

COMPANY PROFILE

Own your code. Own your data.

AntA by MK Technologies — smart management systems that run offline, stay secure, and get smarter online.

anta.mkrs@gmail.com

Built in Egypt · Designed for the MEA region

EDITION 2026

01 · ABOUT

Resilient by design, owner-controlled by principle

MK Technologies, short for Machine Knowledge Resilience Solutions, exists to make business software resilient and owner-controlled. We believe organizations should never lose access to their systems or their data because of a connection, a subscription or a vendor decision. That belief shaped AntA: software that works offline, protects data locally and uses online intelligence only when you choose.

From medical centers and retail stores to vehicle fleets, HR departments and private homes, AntA turns day-to-day operations into organized, trackable and measurable workflows — with no hidden fees and no artificial limits. Every AntA solution runs locally first, then connects online when you want intelligence, remote access or integration — never the other way around.

02 · MISSION & VISION

Why we exist, and where we're going

Mission: To give businesses and individuals software they fully own: their code, their data and their operations, protected by offline security and empowered by online intelligence.

Vision: A region where every clinic, shop, fleet, HR team and home runs on resilient systems that never depend on someone else's servers to keep working.

03 · WHAT MAKES ANTA DIFFERENT

Six principles, one operating system

Ownership — your code, your data, your control. No vendor lock-in, no rental access, no surprises.

Offline-first security — systems run 100% offline and store data locally on your premises.

Online intelligence — optional online mode for smart analytics, remote access and integrations.

Local hosting — host on your own resources, with access for up to 6 locations free of charge.

No hidden fees — unlimited users, visits, patients, branches and storage where applicable.

Built for the region — designed with Egyptian and MEA business realities in mind.

04 · SOLUTIONS AT A GLANCE

One suite. Every operation.

AntA Care — Clinic and Medical Center Management. Patient records, in-house pharmacy, doctor commissions, appointments, queue, financial module and partner management — all offline.

AntA Shop — POS and Retail Management. Multi-branch POS, full accounting, instant P&L, payroll, loyalty programs and analytics across every branch.

AntA Fleet — Fleet Management. Daily operations, driver portals, GPS tracking, complete maintenance module, spare parts and automated license-renewal reminders.

AntA Home — Smart Home Management. Staff, scheduled maintenance, warranties, stock, seasonal checklists and cost tracking in one secure place.

AntA Car — Private Car Management. Maintenance, mileage, tires, batteries, violations and renewals across every vehicle you own.

AntA HR — HR Operations Solutions. Document Creator, Employee Assets Book, ATS, vacation planner and digital archive — full employee life cycle.

05 · COMING SOON

What we're building next

Job Evaluation Tool — structure and grade roles objectively.

Compensation & Benefits Portal — salary structure, grading, increases and promotions.

Performance Evaluation Tool — measurable employee performance.

Budget and Forecast Tool — planning and forward-looking finance.

Social Insurance Management — Form 2 calculation and monthly breakdown tracking.

HR ROI and Metrics Dashboard — quantified HR impact.
